Email: shadatrollio5@gmail.com

GitHub: <https://github.com/MdShadatrolli>

Mobile: [+91 8088051514](tel:+918088051514)

SKILLS

Languages:	Java ,Python
Tools/Platforms:	NumPy , scikit-learn, Pandas, Matplotlib, Docker, Flask, Linux, Conda
Soft Skills:	Problem-Solving, Logical Thinking, Project Management, Adaptability

PROJECTS

Dentocare Clinic – Web Application	Jul’25
- Built a full-stack dental clinic web application with appointment booking, patient inquiry management, treatment information, and contact functionality. - Developed a responsive frontend using React and Tailwind CSS featuring service pages, doctor profiles, seamless navigation, and mobile-friendly design. - Implemented a Node.js and Express.js backend with MongoDB for secure data storage, RESTful APIs, and efficient management of appointments and patient inquiries. TECH: <i>React.js, Express.js, Tailwind CSS, MongoDB, Node.js</i>	
Shared Expenses Management Web App	Jun’ 26
- Built a full-stack expense sharing application that manages group expenses, tracks balances, handles settlements, and supports dynamic member onboarding/offboarding. - Implemented a Flask backend with MySQL, automated CSV import processing, anomaly detection, multi-currency expense handling, and transparent balance calculations with detailed transaction tracing. - Added authentication, group management, debt settlement workflows, and comprehensive reporting features with a responsive web interface. TECH: <i>Python, Flask, MySQL, HTML/CSS, Docker, GitHub Actions</i>	
California House Pricing – ML Regression Web App	Nov’ 25
- Built an end-to-end machine learning web application that predicts California housing prices using a trained regression model. - Implemented a Flask backend with automated scaling and preprocessing, integrated a clean HTML/CSS UI, and deployed the app using GitHub Pages and Docker. - Added CI/CD automation through GitHub Actions for seamless updates and reproducible builds. TECH: <i>Python, Flask, Docker, GitHub Actions</i>	

TRAINING

Data Structures & Algorithms – Summer Training <i>CipherSchools</i>	Aug’25
- Developed a strong understanding of algorithmic paradigms including Divide and Conquer, Backtracking, and Greedy strategy design, with practical implementation in coding exercises. - Performed time and space complexity analysis using Big-O notation, optimizing solutions to reduce computational overhead and improve efficiency. - Solved structured problem sets and coding challenges to enhance logical reasoning, edge-case handling, and real-world problem modelling. - Strengthened debugging and optimization skills by refactoring naive solutions into scalable, performance-efficient implementations.	

CERTIFICATES

Full-Stack Development with MERN <i>NASSCOM</i>	Nov’24
Introduction to Docker and Kubernetes <i>NASSCOM</i>	Nov’24
ChatGPT Made Easy: AI Essentials for Beginners <i>Udemy</i>	Aug’ 25
Master Generative AI & Generative AI Tools (ChatGPT & More) <i>Udemy</i>	Aug’ 25
Build Generative AI Apps and Solutions with No-Code Tools <i>Udemy</i>	Aug’25
Data Structures and Algorithm <i>CipherSchools</i>	Aug’25
Introduction to DevOps <i>IBM</i>	Apr’26

EDUCATION

Lovely Professional University	Phagwara, Punjab
Bachelor of Technology	Aug’ 23 – Present
Computer Science and Engineering; CGPA: 7.00	
LU Cent International School	Dehradun , Uttarakhand
Intermediate	Jun’ 21 – Aug’ 22
PCM; Percentage: 70	
Basaweshwara International Public School	Bagalkot, Karnataka
Matriculation	Jun’ 18 – May’ 19
Percentage: 81.3
